PROFILE

Enthusiastic developer with 5 years of experience planning, leading, building and maintaining responsive digital products for startups as well as enterprise clients.

My focus is on frontend, however, I am capable of and motivated to dive into NodeJS backend more. Member of the "Women in Tech" movement in Berlin, I can work in French, English and German.

COMPETENCES

Frontend:

NextJS

ReactJS

Typescript

Javascript

HTML/CSS

Redux

Tailwind

Handlebars

DotJS

Bootstrap

StyledComponents

Backend:

NodeJS

Python

Express

SQL

MongoDB

Mongoose

REST

GraphQL

Apollo

AWS

S3

Lambdas

CloudFront

AEM

Azure AD

Docker

Misc:

Jest

Accessibility

CI/CD

Agile and SAFe methodology

Prompt engineering tech

CLIENTS

Automobile: Volkswagen, Audi, Porsche
Health: SuperVista
Finance: Claimer
Agency: Sinnerschrader, Accenture, MHP

Place and date: Berlin, December 2024

EXPERIENCES

Recent Projects, Freelance

09/2023 - 06/2024 in Berlin, Germany

- **Next Portfolio Website:** <https://projects-portfolio.vercel.app/>
- **Node REST API** for handling the users of a website
- **Next App** with Express and Supabase
- **Open Source Projects** e.g. here/map-api
- **La Toile En Couleur** a project for book edition

Software Consultant, MHP

11/2022 - 07/2023 in Berlin, Germany

- **Porsche: PWA Driver Logbook** (greenfield project)
 - Lead the team which developed mobile and desktop MVP
 - Created a specific design library for the application
 - Implemented features e.g. list of trips, map visualisation, search, filters, categorisation, merging trips, i18n, MFA with Microsoft Azure Active Directory...
 - Lead the team as frontend representative for decisions such as API architecture, devops topics, technology choices, requirements, design alignments...
 - Connected frontend and backend through GraphQL APIs
 - Supported building the Admin dashboard with features e.g. search, filters, statistics, activation and deactivation of a car...

Software Consultant, Claimer

03/2022 - 08/2022 in London, UK

- **Claimer: Web App to declare R&D claims for English start-ups**
 - Created workflows to enable customers to import financial data from various 3rd party APIs
 - Implemented navigation bar with search, sort and filters feature, and carried out usability testing
 - Built CRM to display and edit customer data
 - Optimised user experience by improving the accessibility of the application

Software Consultant, Sinnerschrader Accenture

02/2020 - 10/2021 in Berlin, Germany

- **Volkswagen: Car Visualizer** (1 million visitors per month)
 - Developed Python script for handling users interactions
 - Built admin dashboard to display and manipulate large sets of images of the cars
 - Automated processes for image management using AWS Lambdas, Cloudfront, API Gateway, S3 buckets
 - Directed accessibility survey to reach AA compliancy
 - Gave accessibility talk during the company day in front of 250 coworkers and clients
- **Audi: Vehicle Transport Platform**
 - Defined processes with Adobe Experience Manager CMS
 - Fixed bugs in large codebase
 - Improved performance and responsiveness of webpages

Software Developer, Super Vista

04/2019 - 01/2020 in Berlin, Germany

- **SPA for order management**
 - Built SPA as part of large e-commerce application
 - Created new features, functionalities and capabilities to add new product verticals
 - Automated manual processes for data management
 - Optimised cross-browser and multi-platform compatibility
